Hunnyboots V2 Slippers Size Guide

1. Print this guide, making sure your printer is set to **print at 100%**, you can check the printed scale in centimetres or inches with a ruler to make sure.
2. It's best for your Greyhound to be laying down when taking this measurement.
3. Cut out the scale and wrap it around the widest part of your Greyhounds largest wrist.
4. Make a note of the measure and choose the next **larger** size if inbetween lines.
4. If between lines, go up to the next larger size.

The objective is to measure the circumference of your Greyhound's largest wrist at its widest point and match it to the inner circumference of the slipper using the scale ruler on the left.

To enable this, make sure the foot you're measuring is straight and NOT weight bearing. Laying down is what they do best, so take your measurements then.

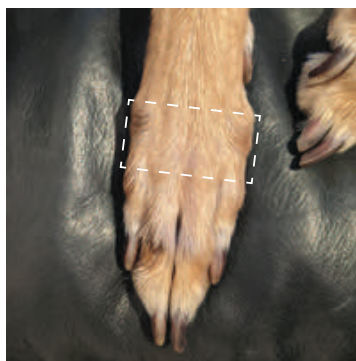

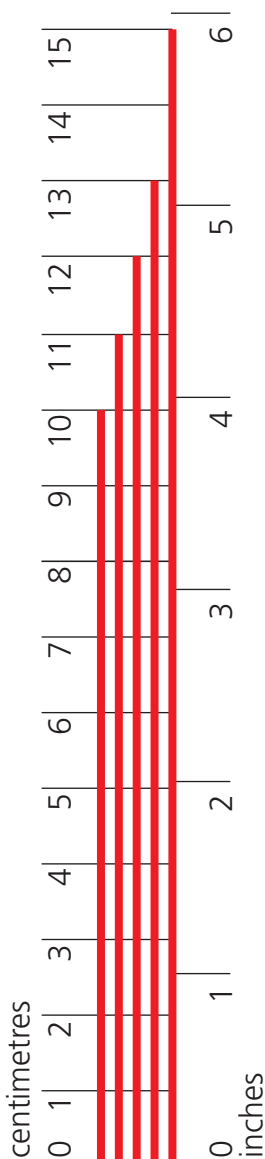

X-Large 15cm

Large 13cm

Medium 12cm

Small 11cm

Weeny 10cm

If you don't have access to a printer, wrap a strip of paper or string around the widest part of the wrist and make a mark at the overlap.
